APR 11 1956

MEMORANDUM FOR: General Cabell

SUBJECT : Agency Passenger Car Mileage

1. This memorandum is for information only.

2. I think you might be interested in the following comparison of passenger car utilization. The figures shown are for fourteen (14) vehicles which in 1953 were assigned directly to specific components on a daily full-time basis, and in 1954 and 1955 were operated in the Headquarters motor pool on a trip dispatch basis.

<u>Year</u>	<u>Mileage</u>
1953	127,724
1954	171,409
1955	173,252

The average mileage per car for 1953 was about 9,000 miles, for 1954 and 1955 about 12,500 miles. Figured another way, the average mileage per car per day was about 50 for 1953 and 65 for 1954 and 1955 (250 days excluding Saturdays, Sundays, and Holidays.)
